

`<Provider />`

```
graph TD; Provider["<Provider />"] -.-> NavigationStore((Navigation Store)); Provider -.-> CarParkStore((CarPark Store)); Provider -.-> LanguageStore((Language Store)); CarParkStore --- CarStore((Car Store));
```

The diagram illustrates a provider hierarchy. At the top is a dashed rounded rectangle labeled `<Provider />`. Three dashed lines connect it to three circles below: **Navigation Store**, **CarPark Store**, and **Language Store**. A solid line connects **CarPark Store** to **Car Store** below it.

**Navigation
Store**

**CarPark
Store**

**Language
Store**

**Car
Store**
